

Network Intrusion Detection System

Weekly Security Report

Period: 2026-02-05 to 2026-02-12

Executive Summary

During this reporting period, the NIDS system analyzed 11 network log entries and generated 18 security alerts. 0 alerts were classified as critical, requiring immediate attention. 18 alerts have been resolved.

Alert Severity Distribution

Severity	Count
High	6
Medium	12

Incidents by Type

Alert Type	Count
Brute Force	4
Port Scan	2
Protocol Anomaly	1
Suspicious Ip	11

Top Sources of Suspicious Traffic

Source IP	Alert Count
45.33.32.100	3
45.33.32.150	2
185.220.101.45	2
203.0.113.100	1
198.51.100.53	1
198.51.100.52	1
198.51.100.51	1
198.51.100.50	1

192.168.1.200	1
192.168.1.106	1

Security Recommendations

- **Brute Force:** 4 brute-force attempts detected. Consider implementing rate limiting and account lockout policies.
- **Port Scanning:** 2 port scan activities detected. Review firewall rules and consider blocking suspicious IPs.
