

# Network Intrusion Detection System

## Weekly Security Report

Period: 2026-04-05 to 2026-04-12

### Executive Summary

During this reporting period, the NIDS system analyzed 0 network log entries and generated 8 security alerts. 4 alerts were classified as critical, requiring immediate attention. 2 alerts have been resolved.

### Alert Severity Distribution

| Severity | Count |
|----------|-------|
| Critical | 4     |
| High     | 2     |
| Medium   | 2     |

### Incidents by Type

| Alert Type    | Count |
|---------------|-------|
| Brute Force   | 2     |
| Port Scan     | 2     |
| Suspicious Ip | 2     |
| Traffic Spike | 2     |

### Top Sources of Suspicious Traffic

| Source IP      | Alert Count |
|----------------|-------------|
| 185.220.101.55 | 2           |
| 10.10.10.102   | 2           |
| 10.10.10.101   | 2           |
| 10.10.10.100   | 2           |

### Security Recommendations

- **Critical:** 4 critical alerts detected. Review and remediate immediately.
- **Brute Force:** 2 brute-force attempts detected. Consider implementing rate limiting and account lockout policies.
- **Port Scanning:** 2 port scan activities detected. Review firewall rules and consider blocking suspicious IPs.
